Dwarf-Roses

Rose-Novelties

on the market in Autum 1921.

Felix Brix (Raiser: Brix — Seller: Teschendorff).

This novelty is a cross between Natalie Böttner and Old Gold. In growth it resembles more Ophelia, also in the shape of the flower, only the bud is more pointed and more prettily formed. The colour resembles an Opal of magnificent tinge, to which, up to now, nothing similar has been produced. The growth is healthy and vigorous the stems upright. It will be an excellent forcing-rose. Each 1/9; 10 = 16/6; 100 = 6·10·0.

Eduard Behrens (Raiser Kordes) Richmond × Admiral Ward. Flower large on strong stems, upright growth, magnificent shape, like Gorgeous. Colour dark blood-red. Growth strong, upright, giving many strong shoots, a willing grower with healthy foliage. Each 2/9; 10 = 25/—.

Cechoslovakia (Raiser Berger). This sort a cross between Pharisäer and Mme. Antonie Marie especially distinguishes itself by its extraordinary upright growth and willingness to bloom. Foliage large, healthy, resembling the mother-rose Pharisäer, but larger. The flower is alabaster-white with salmon-red, towards the centre down to the base changing to sun-gold. Bud often 6 to 7 cm long. Promises to be one of the best cutting roses, especially as it retains its bloom for a long time. Each 2/3; 10 = 20/—; 100 = 8·0·0.

Besides the following sorts there are quantities of other kinds for sale. Offers made if wished. The large printed Sorts are on hand in large quantities.
